PROFESSIONAL SUMMARY

Software Engineer (Backend/Platform) with 4+ years building microservices and event-driven systems using **Java, Spring Boot, Kafka, Cassandra, Kubernetes**. Currently at **IBM (CoreGuuT)**. Proven track record delivering APIs, data models, and CI/CD improvements across multi-cluster deployments; strong systems mindset; competitive programming (LeetCode Knight, CodeChef 4-Star).

TECHNICAL SKILLS

- Languages:** Java, Python, C++, JavaScript, TypeScript, Scala
- Backend:** Spring Boot, Spring Security, REST APIs, Flask
- Data:** Cassandra, MySQL, MongoDB, Redis, DynamoDB, SQLite
- Streaming:** Kafka
- Cloud/DevOps:** Docker, Kubernetes (IKS), ArgoCD, Jenkins, GitHub/GitLab, AWS, Azure
- Observability / Domain:** OpenTelemetry, Instana, XBRL

WORK EXPERIENCE

- IBM - Software Developer**

Markham, Ontario

Java, Spring Boot, Python, Cassandra, Kafka, Kubernetes

October 2024 – Present

 - Architected and implemented **POST Navigation DSL API** with transactional rollback logic, multi-level validation (feature/group/item scope), and idempotent duplicate detection for Portal 2.0; atomic creation with automatic cleanup on partial failures.
 - Designed **denormalized Cassandra schema (4 specialized tables)**; reduced lookup latency for brandedURL/externalIdentifier queries by **65%** across **4 production clusters**.
 - Engineered **Kafka monitoring microservice** with Redis-backed locking and Spring CacheManager; **30+ topics, 500K+ events/day**; reduced duplicate alerts by **~90%** while keeping sub-minute outage detection.
 - Resolved **Kafka client CVEs (CVE-2025-27817)** across **5+ microservices**; automated vulnerability scanning in Jenkins (**~30%** less manual review). Deployed across **10+ IKS clusters (NA/EU)** via **ArgoCD GitOps** and Kapitan.
- Concordia University - Developer**

Montreal, QC

Java, Spring Boot, Angular, Kubernetes

September 2022 – January 2024

 - Streamlined deployment with **Java, Angular, Kubernetes**; **44%** reduction in deployment time and developer workload.
 - Improved **MongoDB** setup and queries; **20%** decrease in data retrieval time.
 - Golden Key Scholarship for automation solutions saving **100+** hours of manual work weekly.
 - Developed **Spring Boot APIs** for **12+ applications** with comprehensive testing.
- Tejas Networks - Software Developer**

New Delhi, India

Java, Spring Boot, Kafka

August 2021 – August 2022

 - Revitalized **TejNMS** with **Spring Boot, SQL, MVC**; **30%** gain in resource allocation efficiency and **20%** reduction in manual recovery time.
 - Led team of **3** migrating **ActiveMQ** to **Kafka**; **20%** decrease in processing time.
 - Developed **SQL** for ETL and reporting across multiple data sources.

EDUCATION

- Master of Applied Computer Science**

Montreal, QC

Concordia University; GPA: 3.6/4.3

September 2022 – January 2024
- Bachelor of Technology, Information Technology**

New Delhi, India

Guru Gobind Singh Indraprastha University; GPA: 3.9/4.3

August 2017 – August 2021

PROJECTS

- DreamShops**

June 2024

Spring Boot, Spring Security, JWT, PostgreSQL, Docker

 - RESTful shopping cart backend: **JWT** auth, role-based endpoints, **Postgres** schema, **Dockerized** deploy.
- CareerLinkup**

June 2023

Python, Flask, SQLite, HTML, CSS, JavaScript

 - Job portal: **Flask** backend, session-based auth, search/filter; **Render** deploy, **CI/CD** for automated integration.
- Movie Review**

December 2022

Cassandra, Kubernetes, Flask, Nginx, Azure

 - **Cassandra** 3-node cluster for **7.8 GB** Kaggle IMDB reviews; optimized queries (**~40%** p95 latency reduction); **3 Kubernetes pods** for data distribution.

ACHIEVEMENTS

- Competitive Programming:** **CodeChef** 4 Star (1848), **LeetCode** Knight (2018), **HackerEarth** (1676).
- Certifications:** Udacity Nanodegree **Deep Learning**; Coding Ninjas **Machine Learning**; MTA **Introduction to Programming Using Python**; Coding Ninjas **Data Structures in C++**.
