TECHNICAL SKILLS

- **Programming Languages:** DotNET, **Java**, C++, Net C#, **Python**, C
- **Web Technologies:** TypeScript, CSS, HTML, Dart, JSON, Yaml
- **Frameworks & Libraries:** Node.js, Express.js, **Flask**, Firebase, Flutter, Material UI
- **Tools & Platforms:** Git, AWS, **Docker**, Postman, **Azure**, Kubernetes, GitLab, Jira
- **Methodologies & Skills:** Agile, **DevOps**, Front-end, Back-end, Unit testing, Micro-services, CI/CD, **SCRUM**
- **Databases:** Cassandra, **MySQL**, MongoDB, SQLAlchemy, PostgreSQL

EXPERIENCE

Software Developer

August 2021 - August 2022

Tejas Networks

New Delhi, India

- Conceptualized and implemented a game-changing reconciliation feature in TejnMS, effectively resolving 15 critical bugs within the QoS domain. This innovation empowered network administrators, resulting in a remarkable 30% improvement in resource allocation efficiency and a 20% increase in service levels.
- Deployed **23** VMs as nodes using Docker for unit testing SDH and GPON units in the TJ5500. This allowed for efficient and isolated testing of network elements, resulting in quicker issue identification, enhanced software reliability, and improved overall testing capabilities.
- Optimized release time by creating bash and shell scripts to automate the process of releasing TejnMS components in both Windows and Linux environments. This achievement led to a **60%** faster delivery of updates and new features, increased development team agility, and a smoother and more reliable release experience.

Teaching Assistant

May 2019 - September 2019

Coding Ninjas

New Delhi, India

- Proficient in C++ Data Structures, successfully addressing more than **800** student inquiries with accuracy and clarity.
- Achieved an exceptional overall rating of **4.73** out of **5.0**, demonstrating a dedication to excellence in teaching and providing outstanding support to students.
- Made a meaningful impact on students' learning journeys by effectively communicating complex concepts and facilitating their understanding of C++ Foundation and C++ Data Structures.

PROJECTS

CareerLinkup | *Python, Flask, SQLite, HTML, CSS, Javascript*

June 2023

- Developed the CareerLinkup job portal website using Flask and HTML/CSS, delivering a seamless user experience for job seekers and employers, while also implementing CI/CD processes using CircleCI for efficient code integration and deployment. The platform was hosted on Render, ensuring reliable accessibility.

GraphColoring | *Python, Flask, SQLite, HTML, CSS, Javascript*

December 2022

- Constructed the GraphColoring web app using Flask for backend operations and HTML/CSS/Javascript for frontend design. Addressed the Online Graph Coloring Problem, employing Python-based First-Fit and CBIP graph coloring algorithms to reduce colors while maintaining distinct vertex colors for adjacent nodes. Deployed the app through the Render platform to ensure widespread accessibility.

Movie Review | *Cassandra, Flask, HTML, Nginx, and Azure*

December 2022

- Executed a full-stack web application, employing Flask for back-end operations and HTML for front-end presentation, showcasing adeptness in both domains. Additionally, integrated Cassandra as the database to effectively manage and store the extensive 7.8 GB dataset of IMDB movie reviews from Kaggle. This highlighted proficient data handling capabilities.

EDUCATION

Master of Applied Computer Science

Montreal, Canada

Concordia University; GPA: 3.74/4.0

September 2022 - January 2024(expected)

Bachelors of Technology in Information Technology

New Delhi, India

Guru Gobind Singh Indraprastha University; GPA: 3.65/4.0

August 2017 - August 2021
