EDUCATION

Master of Applied Computer Science

Concordia University; **GPA: 3.58/4.3**

Montreal, Canada

September 2022 - January 2024 (expected)

Bachelors of Technology in Information Technology

Guru Gobind Singh Indraprastha University; **GPA: 3.65/4.0**

New Delhi, India

August 2017 - August 2021

TECHNICAL SKILLS

- **Programming Languages:** DotNET, **Java**, C++, ASP.Net, C#, **Python**, C
- **Web Technologies:** TypeScript, CSS, HTML, Dart, JSON, Yaml, jQuery
- **Frameworks & Libraries:** Node.js, Express.js, **Flask**, Firebase, Flutter, Material UI, MVC
- **Tools & Platforms:** **Git**, AWS, **Docker**, Postman, **Azure**, Kubernetes, GitLab, JIRA, BitBucket
- **Methodologies & Skills:** Agile(XP & TDD), **DevOps**, Front-end, Back-end, Unit testing, Micro-services, CI/CD, **SCRUM**
- **Databases:** Cassandra, **MySQL**, MongoDB, SQLAlchemy, PostgreSQL

EXPERIENCE

Software Developer

Tejas Networks

August 2021 - August 2022

New Delhi, India

- Implemented reconciliation feature in TejnMS, resulting in a **30%** improvement in resource allocation efficiency and the ability to recover nodes and links, saving **20%** of the time required for manual recreation.
- Deployed **23** VMs as nodes using Docker for efficient unit testing of SDH and GPON units in the TJ5500, resulting in quicker issue identification, enhanced software reliability, and improved overall testing capabilities.
- Developed bash and shell scripts for TejnMS release automation in Windows and Linux, leading to a **60%** faster delivery of updates and new features while improving development team agility and release reliability.

Teaching Assistant

Coding Ninjas

May 2019 - September 2019

New Delhi, India

- Proficient in C++ Data Structures, successfully addressing more than **800** student inquiries with accuracy and clarity.
- Achieved an exceptional overall rating of **4.73** out of **5.0**, demonstrating a dedication to excellence in teaching and providing outstanding support to students.
- Acquired skills encompass Data Structures, C++, Object-Oriented Programming (OOP), Team Leadership, Communication, and Computer Science.

PROJECTS

CareerLinkup ([link](#)) | Python, Flask, SQLite, HTML, CSS, Javascript

June 2023

- Developed the CareerLinkup job portal website using Flask and HTML/CSS, achieving a **99.9%** website uptime for reliable accessibility hosted on render.
- Implemented CI/CD processes using CircleCI, reducing deployment times by **40%** and ensuring efficient code integration and deployment.

GraphColoring ([link](#)) | Python, Flask, HTML, CSS, Javascript

April 2022

- Created the GraphColoring web app utilizing Flask for backend operations and HTML/CSS/JavaScript for frontend design. Deployed the web app via the Render platform, ensuring widespread accessibility.
- Reduced the number of colors used in the Online Graph Coloring Problem by **30%** using Python-based algorithms while ensuring distinct vertex colors for adjacent nodes.

Movie Review ([link](#)) | Cassandra, Flask, HTML, Nginx, and Azure

December 2022

- Executed a full-stack web application, employing Flask for back-end operations and HTML for front-end presentation, showcasing adeptness in both domains.
- Integrated Cassandra as the database to effectively manage and store the extensive **7.8 GB** dataset of IMDB movie reviews from Kaggle, highlighting proficient data handling capabilities.
